Southern Idaho Timber Protective Association

1. Upgrade narrowband radio equipment (base stations, repeaters, mobiles, and hand held) to meet latest interagency digital standards (P25) and assure continued compatibility.
2. Replace serviceable but aged water tenders with newer vehicles to assure performance and limit potential liability issues.

Other Issues

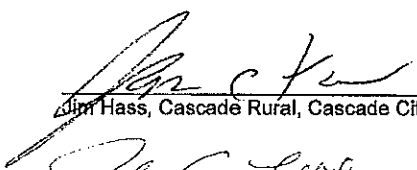

- Encourage the employment of current technology for realizing more effective assessment, prevention and response. Specifically support the following efforts:
 - Development of a County-wide Geographic Information System
 - Use of county wide Hazard Assessment Software Applications
 - Updating the 911 Addressing System
- Maintain the Community Wildfire Protection Plan as a living document and in the short term:
 - Analyze existing geographic areas for current hazard assessment.
 - Identify areas outside a current rural fire district and encourage the development of a rural department.
- Create a sub-division fuels reduction policy to be amended to the County Land Use Development Ordinance
- Improve working relationship with the State Fire Working Group and Homeland Security Bureau.
